QUALITY POLICY

Since 1976, LMF Biokimica has been the leader in technology in the tanning sector, wherever there are industries prepared to collaborate in a perspective of quality.

The sale of chemical products is always supported by research and development activities and technical service that guarantees the appropriate realization of finished product as requested by the market, but also from the preparation of declarations / certifications that are always more in request in the fashion and automotive sector, as well as all the mandatory technical documentation necessary for the sale of the products themselves.

The medium and small enterprises, which are typical in our tanning sector, therefore find LMF Biokimica a reliable partner to face a market which is always more demanding in terms of quality, innovation, price and respect of environment and health of employees workers.

Strategies have been consolidated to meet the specific needs of large-scale tanning industries, the major part of which are in Veneto district.

The delocalization of the production activities towards countries with lower labour costs has allowed LMF Biokimica to be a further strength of assistance for its customers.

It is necessary to form a technical team capable of working abroad and also for a long period. It is convinced that work needs to be followed there where it is.

Always in view of this, LMF uses reliable intermediaries in various countries that can share our policy and help us to convey it to final customers.

LMF Biokimica considers it essential to count on chemicals of absolute reliability which are purchased from qualified and experienced suppliers in the tanning sector worldwide: we are able to propose new and innovative products to be distinguished from competitors.

At the same time, a constant control of supplies enables us to guarantee our customers of meeting their specific quality requirements, especially mandatory ones.

During these years, LMF Biokimica has selected a wide range of products that can meet the needs of tanneries in all phases of the production process from the wet-end to finishing, in which the leather is valued by an aesthetic point of view and for its technical content.

Concrete and ambitious objectives are planned, updated periodically and continued through the involvement of all parties concerned and the adoption of principles in reference to:

PROFESSIONALISM, COMPETENCE AND RESPONSIBILITY
INNOVATION, RELIABILITY AND PRODUCT DIVERSIFICATION
RESPECT OF THE BINDING REQUIREMENTS AND REQUESTS OF CUSTOMERS
PRINCIPLES OF ENVIRONMENTAL SUSTAINABILITY
TIMLINESS OF DELIVERIES
TECHNICAL ASSISTANCE AND AFTER SALE SERVICE
ABILITY TO MANAGE EMERGENCY SITUATIONS
CUSTOMER SATISFACTION
GROWTH OF SALES VOLUME.

In this context, Management believes that maintaining its ISO 9001 Quality System certification is a strategy for continuously improving the effectiveness of all company processes, as well as meeting the needs and expectations of all internal and external stakeholders, including through adequate management of risks and opportunities that may impact the compliance of products, services, and processes.

Policy, integrated with the above-mentioned objectives and principles, is appropriate to the aim of our organization and communicated to all parties concerned. In case of significant and influential amendments on quality will be re-examined and updated and re-circulated.
